

We care in every step

INTEQC, produced by new innovative production technology namely, **Immune TEQC Technology**. We do our best on selecting the best raw materials and feed additive which stimulating immunity and increasing disease resistance.

The new production technology enhances digestibility and nutrient adsorption in animal.

Immune TEQC Technology

Attractability and Palatability

Good Growth performance

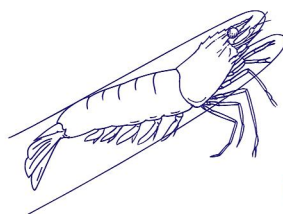

Slow solubility in water and low leaching

Short chain peptides and amino acids

No residue and environmental friendly

ISO 9001 : 2000

INTEQC FEED CO., LTD.

Net Weight **25** Kg.

Special Specification :

- High quality of raw material with fully nutrient requirement and attractability from natural sources.
- Stimulate growth and Increase survival rate.

Quality Ingredients :

Fish meal, squid meal, Dehulled soybean meal, wheat flour and/or broken rice, Lecithin, fish oil, vitamins, mineral and preservatives (Antioxidant : BHA + BHT and Antimold : Propionic acid)

Special Raw Materials :

- Salmon fish oil : Which contain high energy and Omega 3 to increase attractability and immune stimulate.
- Chelate mineral : These mineral combine with amino acid to enhance bioavailability.

Feeding Program for Shrimp :

Age (days)	Shrimp weight (g) /shrimp per kg	Feed Number	%Feed / Body weight	Time/day	ADG (g/d)	FCR
1 - 10	0.1 / 100,000	101	-	6	-	-
10 - 20	1.5 / 2,000	102	-	6	0.12	-
20 - 30	2.0 / 500	102 + 103	-	6	0.17	-
